Company Overview

Data Foundry is a privately held company, headquartered in Austin, TX. We own and operate purpose-built, carrier-neutral data centers that provide colocation and managed services for enterprise customers across a variety of industries, including energy, healthcare and financial services. The company's premier data centers are supported by experienced onsite technicians, security staff and customer support 24 X 7 X 365. Founded in 1994, Data Foundry was one of the first 50 Internet service providers in the United States.

Today, Data Foundry controls and manages over 650,000 square feet of data center space in Austin and Houston, TX, as well as a global network and colocation presences for deployments worldwide. The company also provides disaster recovery readiness solutions, such as secondary sites and dedicated office space to complement a core suite of services.

Data Center Specifications

Data Foundry provides: wholesale and retail data center colocation, network services, disaster recovery and managed services in these data centers:

- Texas 1 – 130,000 SQ FT
- Texas 2 – 325,000 SQ FT
- Austin 1 – 40,000 SQ FT

Compliance

Data Foundry has made the investment in critical infrastructure, tools, services and personnel required to achieve regulatory compliance with SSAE 16, HIPAA, the US-EU Safe Harbor and PCI. Our staff and facilities have been audited by third parties to reassure our customers that these regulations are met. Our compliance reflects our commitment to support the highest standards for business process control, data security and privacy.

Services

COLOCATION

Premier data centers for enterprise customers include all of the technology, equipment and expertise to protect mission-critical data.

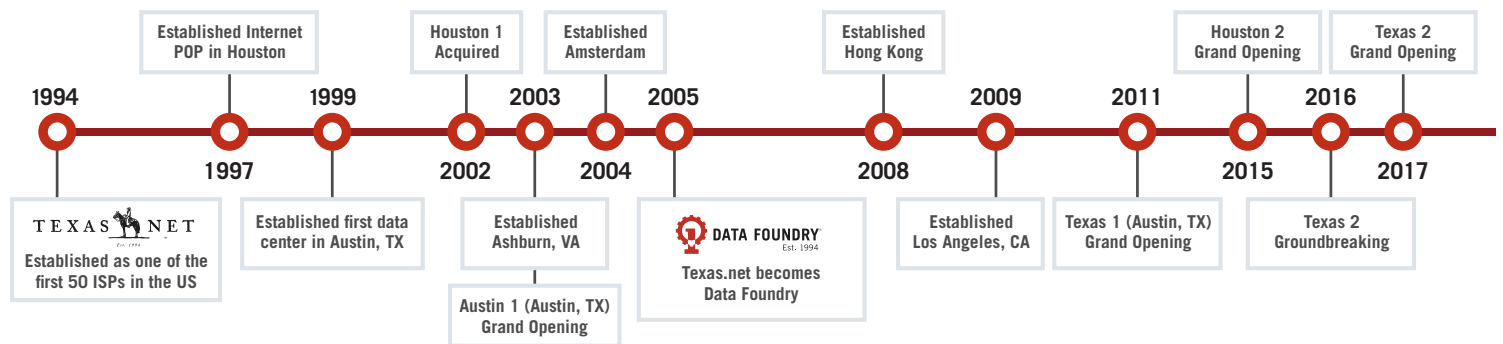

- Accommodate any sized colocation configuration
- Customized solutions to meet company specific criteria
- Hosting HIPAA, SOX, PCI, FINRA compliant customers
- Annual SSAE-16 audits of data center
- Industry-leading Service Level Agreements
- Dedicated customer offices

NETWORK SERVICES

Carrier-neutral data center facilities provide direct access to over 16 network providers. Data Foundry also offers a blended Internet service that ensures the most efficient and reliable routing for network connectivity. We offer 100% network uptime and availability SLAs. Other network services include private transport and satellite pad access.

MANAGED SERVICES

In addition to colocation and carrier-neutral network access, Data Foundry provides a variety of managed services including network assessment and management, security services, cloud services, infrastructure and disaster recovery services.

EXPERT SUPPORT

Our high-touch services include expert support such as remote hands services, migration & installation planning, customer admin portal, connecting subfloor power and network, and structured cabling and labeling. Highly skilled engineers and technicians operate as an extension to customers' in-house IT staff.

- 24x7x365 onsite trained support
• Every call answered by an actual person who can begin addressing the customer's need, in an average of nine seconds or less
• Documented and automated escalation and troubleshooting procedures
• Customer web portal provides direct access to usage statistics, past invoices, contacts and more

Remote Hands Services include, but are not limited to the following:

- Installation of equipment in racks and cabinets
• Patching of network connectivity between devices and network switches
• Loading and unloading of backup tapes
• Power cycling
• Hard drive swap
• Direct command line entry for basic troubleshooting
