

Houston 2 – 350,000 sq ft, carrier-neutral data center located in Houston, TX

1. BEYOND CONCURRENTLY MAINTAINABLE INFRASTRUCTURE

Not only can every Houston 2 infrastructure component be isolated, maintained, repaired, or completely replaced without any impact to customers, but Houston 2 will maintain N+1 redundancy even during a maintenance event.

2. EXTREME POWER DENSITY – UP TO 50 KW PER CABINET

Houston 2 utilizes a highly efficient chilled water cooling system that supports most any power density. With cabinet density options of up to 50 kW, Houston 2 is designed to support standard or High Performance Computing (HPC) deployments.

3. DUAL POWER FEEDS

Houston 2 is dually fed by two underground power feeds. Each power feed enters the Houston 2 campus via diverse paths.

4. CARRIER-NEUTRAL FACILITY

Houston 2 is a carrier-neutral facility strategically located in an area of dense fiber-optic carriers. Houston 2 offers a choice of 11+ On-Net carrier options when selecting a network solution.

5. EIGHT LAYER SECURITY

With features such as gated entry access, perimeter fencing, man-traps on every entrance (including the loading dock), biometrics, and around-the-clock security personnel, Houston 2 employs eight layers of security to protect your mission-critical operations.

6. NO RAMPS & NO STAIRS (DEPRESSED SLAB DESIGN)

Houston 2 is specifically designed to allow for smooth and safe migrations of customer equipment. Houston 2's design includes a 3-foot depressed slab that allows customers to move equipment into and around the facility without traversing any steps, ramps, or lifts.

7. ELEVATED FOUNDATION (FURTHER FLOOD PROTECTION)

The Houston 2 campus is located above the 500-year flood plain. In addition, Data Foundry went a step further to protect against flooding by elevating the foundation an extra 3 feet relative to the surrounding area.

8. SERVICE FOCUSED STAFF

Houston 2 offers peace of mind that only comes from having trained security, highly-skilled engineers and facilities personnel supporting your systems on-site 24x7x365. Our staff is trained to provide highly responsive personal service.

9. DEDICATED OFFICE SPACE OPTIONS

Houston 2 offers dedicated on-site offices and conference rooms that are in close proximity to the data center floor. Data Foundry's worksite recovery service allows clients to literally move business operations to Houston 2 in the event of a disaster.

10. TECHNOLOGY BRIEFING CENTER

Houston 2 offers a full-featured presentation room that accommodates up to 75 people. The "Technology Briefing Center" is ideal for customers' board meetings, investor/client presentations and networking functions. Schedule it for your next event.
